

Un-Enrolling AirWatch

1. Tap **Settings**
2. Tap **General**.
3. Tap **Device Management**.
4. Tap **AirWatch MDM/V_11**.
5. Tap **Remove Management**.
6. Enter your device passcode.
7. Tap **Done**.
8. Tap **Remove**.

This removes the AirWatch settings on your device. It should delete the AirWatch application. If it does not, you can delete the application manually or leave as is, to re-enroll at another time. If you choose to re-enroll, tap the Agent app to open. You should be directed to the Server Details screen, step 2.
